▼ Data sources used by this app

These are the Delta tables the pages will query.

```
actuals: ppe_dscoe.default.ex_sales_table_historical  
forecast: ppe_dscoe.default.placeholder_forecast_outp  
backtest: ppe_dscoe.default.placeholder_backtest_outp  
prices: ppe_dscoe.default.placeholder_prices_inputta  
dnd_company: ppe_dscoe.default.company_level_blueberi  
dnd_depot_current: ppe_dscoe.default.depot_level_curi  
dnd_depot_hist: ppe_dscoe.default.depot_level_histor
```

DB is not configured yet. You can still run the app shell locally, but the pages will need Databricks SQL connectivity to load data.

Design note: this app keeps arithmetic and statistics deterministic (SQL/Python) and uses an assistant only for routing and explanation.
